

R.A. Brown Ranch

Customer Appreciation - Commercial Bred Female Sale

Wednesday, March 11, 2020

Commercial heifers will sell during the 5th Annual RAB Spring Bull Sale
(Following the Black bulls and just before the Red Angus bulls)

How the Commercial Female Sale will work:

- Cattle will all be videoed at their ranch or origin prior to the sale and video of each consignment will be available through RABrownRanch.com. Video will be representative of the consignment, but may include other cattle than those included in a specific lot. (Example: Video of Lot C1 might include cattle from the same pasture that didn't meet the pregnancy or age requirements as specified in Lot C1) During the auction, bidders will view the females on video monitors onsite at R.A. Brown Ranch or through online bidding on DVAuction. This way the pregnant females are only moved once.
- Females will be sold in "gate-cut" sorts of approximately 10 head. The winning bidder will have the option of "rolling" subsequent and consecutive 10 head sorts from the same lot, and at the same bid price.
- The following page include general descriptions of each ranch's entire consignment as well as delivery information. Our Sale Day Supplement will have updated palpation/ultrasound information and how that impacts the exact number of head in each lot.
- The Commercial heifer lots represented in this catalog will be sold FOB their respective consignor's ranch.

Breeding Guarantee: All commercial Females identified as "Bred" have been determined pregnant by a competent ultrasound or palpation technician.

If prior to May 1, 2020 it is determined (by competent palpation/ultrasound technician) that one of the commercial females you purchased in this sale is not pregnant, then please call us and you will be reimbursed (by the seller) the difference between her purchase price and salvage value.

Sale Feature! 250 Head of Young American Red Bred Females from the famed King Ranch® Program...

Widely adaptable, uniform solid red hides and superbly maternal the American Red female is great way to produce more pounds of calf per section on some of the south's most challenging environments. As the founder of both the Santa Gertrudis breed and Santa Cruz composites, it's no surprise that King Ranch is the leader in delivering these heat tolerant Red Angus composites with abundant maternal heterosis and more that adequate end-product merit. When we study the history, it makes sense that King Ranch and R.A. Brown would team up to deliver this initial public offering of American Red females. The Brown Family has been supplying elite profitability and high carcass merit Red Angus genetics to King Ranch for almost two decades.
